

Karri Kuoppamaki
Vice President, Radio Network Technology Development and Strategy
T-Mobile USA

Karri Kuoppamaki is the Vice President, Radio Network Technology and Strategy for T-Mobile USA. In this role, Karri is responsible for Radio Access related technology development activities, including device development, as well as ensuring alignment between T-Mobile USA Network Technology and the regulatory environment, specifically in the area of radio technology and spectrum policy. Karri also drives the strategic long term technology strategy activities both internally as well as towards external stakeholders.

Karri has 20 years of international experience in product marketing, product development and technology management in the wireless industry, and has worked in multiple countries in Europe, Africa and USA. He has a proven track record in introducing, defining and developing new technologies for the telecommunications market.
