

Luciano Leonel Mendes
Research Coordinator of Radiocommunication Reference Center
Inatel
Coordinator of the Research Commission, 5G Brasil Project

Luciano Mendes received the Doctor degree in Electrical Engineering from Unicamp, Brazil in 2007. Since 2001 he is a professor at Inatel, where he has coordinated several research projects. From 2013 to 2015 he was a visiting researcher at the Vodafone Chair Mobile Communications Systems – TU Dresden. Since 2015, he has acted as the Research Coordinator of the Radiocommunication Reference Center at Inatel, which is a research project aiming at addressing the main challenges regarding wireless, satellite and mobile communications in Brazil. His main area of interest is solutions for the physical layer for 5G networks, a research field where he has published several papers in the last years.
