

Day 1 – 09:25

PANEL: The Progress of 5G Spectrum and Regulatory Policy

Essential to the advent of commercial standardized 5G technology deployments beginning in late 2018 will be the identification and allocation of more licensed, shared and unlicensed spectrum in the low, mid and high bands, as well as appropriate regulatory policy for future network densification. This panel of worldwide experts provides an overview of their region's progress to enable 5G deployment, challenges faced and solutions provided.

Moderator: 5G Americas

Panel:

Mr. Ku Wen, China

[José Gustavo S. Gontijo, Brazil](#)

Mr. Gaku Nakazato, Japan

[Peter Stuckmann, European Union](#)

MSIT, Korea

FCC, U.S.A.
